## ABOUT ME

Highly motivated Computer Science graduate, and skilled in programming, Data Structure ,algorithms, software development, and a fast learner with Java. Interested in leveraging my education and the skills in the field of software development and pushing forward the field.

## SKILLS

Programming Languages: Java

Backend Frameworks: Spring Boot

Frontend Frameworks: Angular

Basic Web Development: HTML, CSS

Database: MySQL

## EXTRACURRICULAR ACTIVITIES

### 🏆 Contest

- Participated in JavaFest 2023 Organized by TherapBD Ltd, which allowed me to improve my skills and gain experience in modern Java programming tools and techniques through teamwork.
- Participated in SRBD coding contest 2023 Organized by Samsung R&D Institute Bangladesh. In this competition I am gaining experience in time management and the importance of perfect problem solving.

### 🏢 Organizations

- I was an executive member of my university's computer and robotics club and participated in internal programming and robotics competitions. I was also an executive member of my department's association, volunteering for all the events organized by the association.

## EXPERIENCE

### | A course in "Java Programming." |

🏠 Smartprogramming.in

📍 Panjab, India

- Completed a comprehensive Core Java course that covered essential programming concepts such as Object-Oriented Programming (OOP), exception handling, collections framework, and multithreading.
- Additionally, completed a Spring Boot course focused on building RESTful APIs, implementing Spring Data JPA with Hibernate for data persistence, Spring Security for application security, and designing microservices architectures.

## EDUCATION

| Bangamata Sheikh Fojilatunnesa Mujib Science & Technology University |

📅 01-Mar 2019 – 01-Mar- 2022

📍 Melandah, Jamalpur

- Subject: **Computer Science and Engineering** 🎓 CGPA: 3.23 out of 4.00 **Exam held:** Month of December 2023

## PROJECTS

### Result-Management-System | 🌐 |

This Web app manages and generates the Semester results for University's which allowing students to view their results from the student dashboard.

- Admin can manage and generate student's result and student's account .
- Students can fill up forms for each semester online
- Student can search their result using valid roll ID

Technology: Java, SpringBoot, HTML, Bootstrap, Thymeleaf
